SUMMARY OF REPORTS ON ILLICIT TRANSACTIONS AND SEIZURES OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES

Received by the Secretary-General
from 1 January to 31 March 1984

The present document is based on data provided by States both Parties and non-Parties to the relevant treaties on the control of narcotic drugs and psychotropic substances, and the designations employed and the presentation of material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or any authority, or concerning the delimitation of any frontiers or boundaries.

Note by the Secretary-General

The Secretary-General has the honour to send herewith a summary of reports on illicit transactions and seizures of narcotic drugs and psychotropic substances communicated by governments to the Secretariat during the period 1 January to 31 March 1984.

The summary has been prepared in accordance with the decision taken by the Commission on Narcotic Drugs at its twenty-second session (E/4455, para. 732) to leave its form to the discretion of the Director of the Division of Narcotic Drugs.

Section 1 of the summary lists the countries or territories which sent in seizure reports during the first quarter of 1984, relating to drugs seized between 1977 and 1984. Data regarding seizures made prior to 1983 have been omitted as no longer of topical interest. Thus, the total quantities of drugs reported seized and shown in Section 2 relate only to 1983 and 1984.

The tables in Section 3 group the reports by the quarter of calendar years 1983 and 1984 in which the seizure was made. Within each of these quarters reports are summarized by region, country or territory, and drug. Within each category individual seizure reports are grouped according to the information provided regarding the country or territory where the drug was obtained and/or produced, the means of conveyance, and the intended destination. Seizures with these features in common are thus shown grouped on one line. The number and nationality of the persons implicated in that group of reports are indicated wherever possible.

V.84-85772

Information reported to the Secretary-General regarding seizures of psychotropic substances is given under the following headings:

Stimulants: amphetamines, other stimulants;
Depressants: barbiturates, tranquillizers, other sedatives;
Hallucinogens: LSD, mescaline, DET, etc.

Details of clandestine laboratories, as well as a list of merchant ships on which drugs were found, and details of which it has been possible to identify with certainty, are given in Annexes I and II.

The term "controlled delivery" is used to describe a technique which allows, under close surveillance, the known passage of an illicit consignment of drugs to take place within or between countries.

Any supplementary information requested by governments will be supplied where available.

QUARTERLY SUMMARY OF REPORTS ON ILLICIT TRANSACTIONS AND SEIZURES OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES

Received by the Secretary-General from 1 April to 30 June 1984

The present summary is based on data provided by States both Parties and non-Parties to the relevant treaties on the control of narcotic drugs and psychotropic substances, and the designations employed and the presentation of material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or any authority, or concerning the delimitation of any frontiers or boundaries.

Note by the Secretary-General

1. This summary of reports on illicit transactions and seizures of narcotic drugs and psychotropic substances is based on information on cases of illicit drug traffic communicated by Governments during the period 1 April to 30 June 1984 and forwarded to the Secretary-General in accordance with the provisions of article 18.1(c) of the Single Convention on Narcotic Drugs, 1961 and article 16.3 of the Convention on Psychotropic Substances. The international drug control treaties require States Parties to furnish this information in addition to that contained in annual reports on the working of the treaties. Details of reported seizures by region, country or territory and drug are at Annex I to this document; a separate list of merchant ships on which drugs were found is at Annex II.

2. Parties to the international drug control treaties undertake to furnish reports on cases of illicit traffic which are important because of the light thrown on the sources from which the drugs are obtained, the quantities involved, the methods employed by illicit traffickers or, in the case of the Convention on Psychotropic Substances, because of new trends. In pursuance of these provisions, the Commission on Narcotic Drugs, in its February 1979 Resolution 4 (XXVII), urged Governments "to take all possible measures to ensure that the most complete and accurate information is obtained and submitted in a timely manner".

3. The aim of this summary is to set forth the material received in tabular and graphic forms so as to assist concerned national authorities to identify trends in the illicit traffic and thus determine the manner in which countermeasures may most effectively be applied. This presentation of data reflects the computerization which has recently been undertaken by the Division of Narcotic Drugs of reports on seizures from the illicit traffic during 1983 and 1984. Data regarding seizures made before 1983 have been omitted as no longer of topical interest; similarly, details of small quantities of drugs seized in local traffic and without significant international aspects have not been included.

V.84-91902

4. The table below lists the States or territories which reported seizures from the illicit traffic during the second quarter of 1984. Twenty-four per cent of reports on seizures furnished during this period were received from four States Members of the Sub-Commission on Illicit Drug Traffic and Related Matters in the Near and Middle East (Afghanistan, the Islamic Republic of Iran, Pakistan and Turkey); nearly 50 per of the seizures reported, and reflected in this summary, are from States in Europe; only one State reported from the Americas. The reporting pattern is thus far from universal. It should also be taken into account that there are 116 States Parties to the Single Convention on Narcotic Drugs, 1961 and to that Convention as amended by the 1972 Protocol, that there are 77 States Parties to the Convention on Psychotropic Substances, and that 95 States and territories reported that illicit traffic had been encountered when furnishing annual reports for 1983.

List of countries/territories which reported seizures:
1 April to 30 June 1984

* Details of reports from this Government of some seizures of small quantities of drugs from local traffic, as well as data regarding seizures made prior to 1982, are not reproduced in this summary.

** In addition to other reports reproduced in this summary, the Government of Burma also reported that, during operation Moe Hein Phase VIII in April/May 1984, 12 drug law enforcement officers lost their lives and 49 were wounded. In addition, 4340 hectares (10723.75 acres) of illicit opium poppy cultivation were destroyed, during the Poppy Eradication Hell Flower IV campaign, between 1 January and 31 March 1984.

5. The chart at page 4 provides a graphic presentation of total reported seizures during the six month period from 1 January to 30 June 1984 identified by the regions in which the seizures were effected.

6. The chart at page 5 indicates the number of seizures of individual drugs or drug types as a percentage of total reported seizures. Thus, reports of seizures of cannabis resin amounted to 31.7 per cent of total reported seizures; those of cannabis 23.4 per cent, and those of heroin 24.6 per cent. This, like all other charts in this summary takes account of seizures reported in both the first and second quarters of 1984.

7. The chart at page 6 indicates the means of transport used to smuggle the drugs reported to have been seized. Particular attention is drawn to the seizures from commercial aircraft (either from passengers or baggage), which amounted to over 50 per cent of the total and to seizures of drugs from the post office mails, amounting to nearly 20 per cent of the total.

8. It is expected that additional and more accurate analyses of trends in the illicit traffic will be made as the computerized data base available to the Division of Narcotic Drugs is expanded. Meanwhile, the Division would welcome observations on the contents and usefulness of the present summary. Comments and suggestions may be addressed to:

QUARTERLY SUMMARY OF REPORTS ON ILLICIT TRANSACTIONS AND SEIZURES OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES

Received by the Secretary-General from 1 July to 30 September 1984

The present summary is based on data provided by States both Parties and non-Parties to the relevant treaties on the control of narcotic drugs and psychotropic substances, and the designations employed and the presentation of material do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or any authority, or concerning the delimitation of any frontiers or boundaries.

Note by the Secretary-General

1. This summary of reports on illicit transactions and seizures of narcotic drugs and psychotropic substances is based on information on cases of illicit drug traffic communicated by Governments during the period 1 July to 30 September 1984 and forwarded to the Secretary-General in accordance with the provisions of article 18.1(c) of the Single Convention on Narcotic Drugs, 1961 and article 16.3 of the Convention on Psychotropic Substances. The international drug control treaties require States Parties to furnish this information in addition to that contained in annual reports on the working of the treaties. Details of reported seizures by region, country or territory and drug are at Annex I to this document; a separate list of merchant ships on which drugs were found is at Annex II.

2. Parties to the international drug control treaties undertake to furnish reports on cases of illicit traffic which are important because of the light thrown on the sources from which the drugs are obtained, the quantities involved, the methods employed by illicit traffickers or, in the case of the Convention on Psychotropic Substances, because of new trends. In pursuance of these provisions, the Commission on Narcotic Drugs, in its February 1979 Resolution 4 (XXVIII), urged Governments "to take all possible measures to ensure that the most complete and accurate information is obtained and submitted in a timely manner".

3. The aim of this summary is to set forth the material received in tabular and graphic forms so as to assist concerned national authorities to identify trends in the illicit traffic and thus determine the manner in which countermeasures may most effectively be applied. This presentation of data reflects the computerization which has recently been undertaken by the Division of Narcotic Drugs of reports on seizures from the illicit traffic during 1983 and 1984. Data regarding seizures made before 1983 have been omitted as no longer of topical interest; similarly, details of small quantities of drugs seized in local traffic and without significant international aspects have not been included.

V.85-20585

4. The table on page 3 of this summary lists the States or territories which submitted reports containing details of seizures from the illicit drug traffic during the third quarter of 1984. A total of 753 seizures of different drugs or drug types were received, some of which, for the reasons stated in paragraph 3 above, have not been included in Annex I to this Summary.

5. Attention is drawn to the fact that a more consistent response by Governments to Commission on Narcotic Drugs' resolution 4 (XXVIII), quoted in paragraph 2 above, would permit trends in the illicit drug traffic to be monitored and possibly forecast with more accuracy. About 60 per cent of the seizure reports received during the third quarter of 1984 were from the Governments of European States; the major part of those seizure reports, in turn, were submitted by the Government of France which, during the third quarter of 1984, was responsible for 48 per cent of all seizure reports received from all regions.

6. About 12 per cent of reported seizures during the same period were received from States in the Near and Middle East. There was a slight increase in the number of reports received from the region of Asia and the Far East (about 15 per cent of the total); this appears, in part, to have been one welcome result of the establishment of the Narcotics Liaison Office of the Association of South East Asian Nations (ASEAN). Again, as was the case in the second quarter of 1984, the overwhelming majority of reports from the region of the Americas was received from the Government of Canada.

7. Reports which were received during the third quarter of 1984 indicate that seizures of drugs from passengers or baggage on commercial aircraft continued to account for up to 50 per cent of all reported seizures. Seizures of drugs from the mails continued to represent the second most frequent means of transport of illicit drugs, judging by seizure reports received.

8. The Division would welcome observations on the contents and usefulness of the present summary. Comments and suggestions may be addressed to:
